1. Project Overview & Business Model

1.1 Platform Summary

This platform is a global Japanese used car export website that connects international buyers with Japanese vehicle inventory. It operates through two core product types: In-Stock vehicles (manually managed) and Upcoming Auction vehicles (sourced from Japan auction houses via API integration).

1.2 Business Model

Component	Description
In-Stock Cars	Cars already owned/available — manually listed by admin with full details, photos, price.
Auction Cars	Upcoming Japan auction lots shown to users. Platform bids on user's behalf on auction day.
Revenue	Agent commission per car, markup on auction purchase price, shipping arrangement fee.
Target Market	Global — all countries where Japanese used car imports are legal.
Core Value	Transparent pricing, secure process, full documentation trail for large transactions.

1.3 Key Differentiators

- Two-type inventory: Real stock + Live auction access
- Secure reservation & bidding with full document trail
- Caller/Agent system for human-verified deals
- Complete finance history for both buyer and admin
- Price Calculation transparency (C&F breakdown)
- Multi-currency, global shipping support

2. User Account Types & Registration Flow

2.1 Account Types

Account Type	Access Level	Key Capabilities
Guest / Visitor	Public	Browse listings, view prices, see auction schedule — cannot reserve or bid
Registered Buyer	Member	Reserve cars, place bid requests, upload documents, track shipment, payment history
Caller / Agent	Staff	Receive lead notifications, manage reservations, verify documents, update deal status
Finance Officer	Staff	View/manage all payments, deposits, refunds, generate finance reports
Admin	Full Access	All above + add/edit listings, manage auctions, user management, system settings

2.2 Buyer Registration Flow

1. User clicks 'Register' — enters: Full Name, Email, Phone, Country, Password
2. Email verification link sent — user must verify before accessing member features
3. Account activated — buyer can now reserve and bid

2.3 Buyer Profile Fields

Field	Required	Notes
Full Name	Yes	As per official ID
Email Address	Yes	Used for all notifications
Country	Yes	Determines shipping ports
Destination Port	Yes	Auto-suggested based on country
ID Document	Yes (before purchase)	CNIC / Passport upload
Company Name	No	For business buyers
Preferred Currency	Yes	USD default, others supported

3. In-Stock Vehicle Module

3.1 Overview

In-Stock vehicles are cars physically available or pre-arranged by the platform. These are manually added by the Admin. Each listing is complete with photos, specifications, chassis number, and pricing.

3.2 Listing Fields (Admin Adds)

Field	Type	Description
Stock ID	Auto	Unique system-generated ID — never reused
Chassis Number	Text	VIN / Chassis — locked to this listing only
Make / Model / Year	Select	Toyota, Honda, Nissan etc.
Grade	Text	Auction inspection grade (e.g. 4, 4.5, 5)
Mileage	Number	In KM
Engine CC	Number	e.g. 1800cc
Transmission	Select	Auto / Manual
Color	Text	Exterior and interior
Body Type	Select	Sedan, SUV, Van, Truck etc.
Drive Type	Select	RHD / LHD, 2WD / 4WD
FOB Price	Currency	Japan port price
C&F Price	Currency	Auto-calculated or manual per country
Photos	Upload	Minimum 8 photos required (exterior, interior, engine, odometer)
Damage Report	Upload	Inspection sheet / photos of any damage
Status	Select	Available / Reserved / Sold
Featured	Toggle	Show on homepage featured section
Arrival Date	Date	Expected at port (if in transit)

3.3 Status Lifecycle

Status	Meaning	Triggered By
Available	Visible and open for reservation	Admin sets on creation
Reserved	24-hour hold by a buyer	Buyer clicks Reserve
Reservation Expired	24 hrs passed, no payment - auto released	System
Payment Pending	Deal closed, awaiting payment	Caller updates after call
Payment Received	Payment confirmed by Finance	Finance Officer
Shipping In Progress	Car dispatched from Japan	Admin/Shipping update
Delivered	Car received by buyer	Admin marks complete
Sold	Transaction fully complete	Final admin close

4. Upcoming Auction Module

4.1 How Japan Car Auctions Work

Japan has multiple physical auction houses (USS, TAA, JAA, AUCNET, JU etc.) that hold auctions on specific days of the week. Only licensed dealers are allowed to participate directly. Our platform acts as a licensed agent/dealer — we participate in auctions on behalf of our registered buyers.

4.2 Auction Data Source

Phase	Source	Method
Phase 1 (Launch)	Manual entry by Admin	Admin adds upcoming lots from auction schedules manually
Phase 2 (Growth)	jpcenter.ru API	API fetch of upcoming auction listings with full details
Phase 3 (Scale)	AUCNET / direct feeds	Direct licensed API integration for real-time data

4.3 Auction Listing Display Fields

Field	Source
Auction House Name	API / Manual
Auction Date & Time (JST)	API / Manual
Lot Number	API / Manual
Make / Model / Year / Grade	API / Manual
Mileage, Engine, Color	API / Manual
Starting Bid / Estimated Price (JPY)	API / Manual
Inspection Photos	API / Manual
Damage Grade Report	API / Manual
Inland Delivery Cost (JPY)	System — per auction house table
Estimated C&F to buyer's country	System calculation

4.4 Auction Schedule Page

A dedicated page showing all upcoming auctions organized by day (Monday through Saturday), auction house name, and estimated delivery charge — similar to Eisen Wheels price calculation page.

- Monday Auctions: AUCNET, Honda Tokyo, JU Tokyo etc.
- Tuesday Auctions: CAA Tohoku, USS Sendai etc.
- Wednesday through Saturday: All major houses listed
- Each row shows: Auction House | Day | Inland Delivery Cost (JPY)

5. Complete Transaction Flows

5.1 In-Stock Car — Full Flow

FLOW A: In-Stock Vehicle Purchase

4. **BROWSE:** Buyer browses In-Stock listings, applies filters (make, model, year, price, country)
5. **VIEW:** Buyer opens car detail page — views photos, specs, damage report, C&F price
6. **RESERVE:** Buyer clicks 'Reserve for 24 Hours' — must be logged in
7. **SYSTEM:** Car status changes to 'Reserved'. A 24-hour countdown timer activates
8. **NOTIFICATION:** Caller/Agent receives instant notification — 'User [Name] reserved [Stock ID] [Car Details]'
9. **CALLER ACTION:** Caller contacts buyer via phone/WhatsApp within 1 hour

10. **DEAL CLOSE:** Caller confirms buyer's intent, explains total price (C&F + agent fee), answers questions
11. **DOCUMENT REQUEST:** Caller requests buyer to upload required documents on portal
12. **DOCUMENT UPLOAD:** Buyer uploads CNIC/Passport and verification documents via their dashboard
13. **DOCUMENT VERIFY:** Caller / Admin verifies uploaded documents — marks as Verified/Rejected
14. **PAYMENT REQUEST:** Finance officer generates payment invoice — sends bank details
15. **PAYMENT TRANSFER:** Buyer transfers full or agreed amount via bank wire
16. **PAYMENT CONFIRM:** Finance officer confirms receipt — updates system
17. **CAR STATUS:** Updated to 'Payment Received' — shipping process begins
18. **SHIPPING:** Admin arranges shipping, adds BL (Bill of Lading) number, vessel name, ETD/ETA
19. **TRACKING:** Buyer can track shipment via BL number on their dashboard
20. **DELIVERY:** Car arrives at destination port — buyer clears customs
21. **COMPLETE:** Admin marks transaction as 'Delivered & Complete'
22. **REVIEW:** System prompts buyer to leave a review/rating

5.2 Upcoming Auction — Full Flow

FLOW B: Auction Bidding Process

23. **BROWSE:** Buyer browses Upcoming Auction listings — filtered by date, make, price range
24. **VIEW:** Buyer opens auction lot detail — photos, grade, inspection report, estimated price, auction date
25. **BID REQUEST:** Buyer clicks 'Place Bid Request' — enters their maximum bid amount (JPY/USD)
26. **SYSTEM:** Bid request logged with status 'Pending Confirmation'
27. **NOTIFICATION:** Caller receives notification — 'User [Name] bid request on Lot [X] for [Amount]'
28. **CALLER CONTACT:** Caller calls buyer — explains process, confirms max bid, explains deposit requirement
29. **DEPOSIT REQUEST:** Caller/Finance requests security deposit (e.g. USD 300-500) to confirm bid
30. **DEPOSIT PAYMENT:** Buyer transfers deposit — Finance confirms receipt
31. **BID CONFIRMED:** System status changes to 'Bid Confirmed'. Buyer and Caller both notified
32. **AUCTION DAY:** Admin/Agent participates in actual Japan auction on behalf of buyer
33. **RESULT — WIN:** Admin marks bid as 'Won'. Buyer notified with final hammer price
34. **RESULT — LOSE:** Admin marks bid as 'Lost'. Buyer notified with message: 'Your bid was [X]. Car sold at [Y].' Deposit refunded within 3-5 days
35. **IF WIN — PAYMENT:** Finance generates invoice for remaining balance (Total C&F minus deposit)
36. **PAYMENT TRANSFER:** Buyer pays remaining balance via bank wire
37. **PAYMENT CONFIRM:** Finance confirms — shipping process begins (same as In-Stock flow steps 14-19)

5.3 Reservation Expiry Handling

If a buyer reserves a car but the caller cannot reach them or no payment is made within 24 hours:

- System automatically releases reservation
- Car status reverts to 'Available'
- Buyer receives automated email: 'Your reservation for [Car] has expired'
- Caller receives notification to attempt follow-up
- Admin can manually extend reservation by additional 24 hours if needed

5.4 Document Requirements

Document	Purpose	When Required
CNIC / Passport	Identity verification	Before payment confirmation
TD (Transfer Document)	Vehicle registration transfer proof	Before shipping
TL (Transfer Letter)	Authorization letter for customs	Before shipping
Proof of Payment	Bank transfer receipt	After each payment
Consignee Details Form	Bill of Lading information	Before shipping arrangement

6. Finance & Payment Module

6.1 Overview

Given the large transaction values involved in car purchases, the finance module must be extremely precise, auditable, and transparent. Every financial event is timestamped, logged with user ID, and tied to a specific Stock ID or Auction Lot ID.

6.2 Payment Types

Payment Type	Description	Flow
Full Car Payment	Complete C&F price for In-Stock car	Invoice → Transfer → Finance Confirms
Auction Deposit	Security deposit to confirm bid (non-refundable if buyer cancels)	Deposit Invoice → Transfer → Finance Confirms
Auction Balance	Remaining payment after winning auction	Balance Invoice → Transfer → Finance Confirms

6.3 Finance Officer Capabilities

- View all incoming payments with status: Pending / Confirmed / Rejected
- Generate payment invoices with bank details
- Mark payments as received with reference number
- Process deposit refunds with reason and timeline
- View complete financial history per customer
- Generate weekly/monthly finance reports (export as PDF/Excel)
- Flag suspicious or unmatched payments for admin review

6.4 Payment Record Fields

Field	Description
Payment ID	Unique system ID — auto generated
Customer ID & Name	Linked to registered buyer account
Stock ID / Lot ID	Car this payment is for — prevents any mix-up
Payment Type	Full / Deposit / Balance / Refund
Amount	In USD (and JPY equivalent if needed)
Currency	USD default
Payment Method	Bank Wire / TT
Bank Reference Number	Buyer's transfer reference
Date Received	Confirmed by Finance Officer
Status	Pending / Confirmed / Refunded
Notes	Any special instructions or flags
Invoice PDF	System-generated invoice attached

6.5 Anti-Confusion Safeguards

Because payments involve large amounts and multiple cars, these rules are enforced at system level:

- Each payment is locked to one specific Stock ID — cannot be applied to another car
- Chassis Number displayed on every invoice and confirmation email
- If two buyers inquire about same car, system shows 'Reserved' to second buyer immediately
- Auction deposits tracked separately — refund only triggered by 'Bid Lost' status
- All status changes logged with timestamp and staff member name who made the change

7. Admin Panel

7.1 Dashboard

- Total Active Listings (In-Stock + Auction)
- Today's Reservations — with buyer name, car, time remaining
- Pending Bids — awaiting caller confirmation
- Payments Pending Confirmation
- Active Shipments with ETA
- New User Registrations
- Revenue Summary (this month / this year)

7.2 Inventory Management

In-Stock Management

- Add New Listing (all fields as per Section 3.2)
- Edit existing listing — any field
- Bulk upload via CSV/Excel template
- Mark as Featured / Unfeatured
- Archive sold cars (history preserved, not deleted)
- Duplicate listing for similar cars

Auction Management

- Add upcoming auction lots manually
- API sync button (when jpcenter.ru API active)
- Mark auction results — Won / Lost per lot
- Assign lots to specific buyer bids
- Update auction schedule and delivery charges table

7.3 User Management

- View all registered buyers with status
- Verify / reject submitted documents
- View complete buyer history (reservations, bids, payments, shipments)
- Suspend or deactivate accounts
- Assign buyers to specific callers/agents
- Export user list

7.4 Shipping Management

- Add/update BL (Bill of Lading) number per purchase
- Add vessel name, ETD (Estimated Time of Departure), ETA
- Update shipment status: Preparing / Dispatched / At Port / Delivered
- Upload shipping documents for buyer download
- Shipping schedule page management (public-facing)

7.5 Reports & Analytics

Report	Frequency	Export
Total Sales	Monthly / Yearly	PDF / Excel
Cars Sold by Make/Model	Monthly	Excel
Auction Win Rate	Monthly	PDF
Top Buying Countries	Monthly	Chart + Excel
Pending Deals (not closed)	Weekly	PDF
Finance Summary	Monthly	Excel
User Growth	Monthly	Chart

8. Caller / Agent Module

8.1 Role Description

The Caller/Agent is the human bridge between platform and buyer. They receive real-time notifications on new reservations and bid requests, make contact with buyers, close deals, verify documents, and update deal status.

8.2 Caller Dashboard

- My Active Leads — all reservations/bids assigned to me
- New Notifications (real-time) — reservation alerts, bid requests
- Call Log — record of each call attempt with outcome
- Document Verification Queue — pending doc reviews
- Deal Status Update — move deal through stages

8.3 Caller Workflow per Lead

38. Notification received: Car reserved or bid placed by buyer
39. View buyer profile: name, phone, WhatsApp, country, previous purchases
40. Click 'Call' — log attempt with time and outcome (Reached / Not Reached / Call Back)
41. After deal close — update status: 'Deal Closed — Awaiting Documents'
42. Document check — verify uploaded CNIC/TL/TD — mark Verified or Request Reupload
43. Coordinate with Finance: 'Documents verified, please send payment invoice'
44. Monitor payment — Finance confirms — update status to 'Shipping In Progress'

8.4 Call Log Fields

Field	Description
Call Date & Time	Auto-logged
Buyer Name & ID	Auto-linked
Car Stock ID	Auto-linked
Outcome	Reached / Not Reached / Scheduled Callback
Notes	What was discussed
Next Action	Follow-up date/time

9. Customer Dashboard

9.1 Dashboard Sections

Section	What Buyer Sees
My Profile	Personal info, ID documents, consignee details — edit anytime
My Reservations	Current and past reservations with status and countdown timer
My Bids	All auction bid requests — status: Pending / Confirmed / Won / Lost
My Purchased Vehicles	Complete list of all purchased cars with full timeline
My Payments	All payments made — invoice download available for each
Shipment Tracking	BL number, vessel, ETD, ETA, current port status
My Documents	Uploaded documents with verification status
Notifications	All system notifications, caller messages, status updates
My Coupons / Offers	Available discount coupons if any
Support / Messages	Contact support, view message history

9.2 Per-Purchase Timeline View

Each purchase in 'My Purchased Vehicles' shows a visual timeline:

- Step 1: Reserved / Bid Placed
- Step 2: Documents Submitted
- Step 3: Documents Verified
- Step 4: Payment Received
- Step 5: Shipping Arranged
- Step 6: Car Dispatched
- Step 7: Arrived at Port
- Step 8: Delivered

10. Price Calculation Module

10.1 C&F Price Formula

C&F Price = FOB Price + Inland Delivery (JPY) + 10% Tax + Handling Charges + Agent Commission + Freight & Shipping

10.2 Price Calculation Page (Public)

A public-facing page (no login required) where visitors can see how pricing is built and estimated inland delivery charges organized by auction house and day:

Auction House	Day	Estimated Inland Delivery (JPY)
AUCNET	Monday	¥ 15,000
Honda Tokyo	Monday	¥ 10,000
USS Tokyo	Wednesday	¥ 10,000
CAA Tohoku	Tuesday	¥ 30,000
USS Osaka	Thursday	¥ 15,000
USS Fukuoka	Friday	¥ 20,000

Note: Freight charges vary by destination country and port. A separate Freight Estimator tool can be added where buyer selects their country/port and gets an estimated freight cost.

11. Supporting Features

11.1 Advanced Search & Filtering

Filter	Options
Make	Toyota, Honda, Nissan, Suzuki, Mitsubishi, BMW, Mercedes etc.
Model	Dynamic based on selected Make
Year Range	From Year — To Year slider
Price Range	Min–Max in USD
Body Type	Sedan, SUV, Hatchback, Van, Truck, Bus, Coupe
Engine CC	Range selector
Mileage	Under 30k / 50k / 100k / 150k+
Transmission	Auto / Manual
Drive	RHD / LHD / 2WD / 4WD
Fuel Type	Petrol / Diesel / Hybrid / Electric
Steering	Right Hand / Left Hand
Color	Multi-select
Grade	Auction grade range
Stock Type	In-Stock / Upcoming Auction / Both
Auction Date	Specific date or date range

11.2 Car Comparison Tool

Allow buyers to select up to 3 cars and compare side-by-side on key specs: price, mileage, year, grade, engine, transmission, fuel type.

11.3 Favorites / Watchlist

Logged-in buyers can save cars to favorites. System notifies them if a favorited car price changes or if a similar car arrives in new stock.

11.4 Chassis Check

Integration with JAAI or similar chassis verification service. Buyer enters chassis number and gets official Japanese auction inspection history. Can be embedded or linked to external verified source.

11.5 Shipping Schedule

Publicly visible shipping schedule showing vessel departures from Japan to major destination ports, with ETD and ETA — updated by admin weekly.

11.6 Damage Condition Report

Each car listing (both In-Stock and Auction) displays the official Japanese auction damage report diagram — showing scratches, dents, rust locations with graded severity markers.

12. Notifications System

Event	Who Gets Notified	Channel
Car Reserved	Caller (immediate)	Dashboard + Email + SMS
Reservation Expiring (2hr warning)	Buyer + Caller	Email + Dashboard
Reservation Expired	Buyer + Admin	Email
Bid Request Placed	Caller (immediate)	Dashboard + Email + SMS
Deposit Invoice Sent	Buyer	Email + Dashboard
Deposit Received	Buyer + Caller + Finance	Email + Dashboard
Bid Won	Buyer (immediate)	Email + SMS + Dashboard
Bid Lost	Buyer (immediate)	Email + SMS + Dashboard
Deposit Refund Initiated	Buyer	Email + Dashboard
Documents Verified	Buyer + Caller	Email + Dashboard
Documents Rejected	Buyer	Email + Dashboard (with reason)
Payment Invoice Sent	Buyer	Email + Dashboard
Payment Confirmed	Buyer + Caller + Admin	Email + Dashboard
Shipping Arranged	Buyer	Email + Dashboard
Car Dispatched	Buyer	Email + SMS + Dashboard
Car Arrived at Port	Buyer	Email + SMS

13. Security & Compliance

13.1 Data Security

- All user data encrypted at rest and in transit (SSL/TLS)
- Document uploads stored in secure private cloud storage (not publicly accessible)
- Role-based access control — staff can only see what their role permits
- All admin actions logged with staff ID and timestamp (audit trail)
- Two-Factor Authentication (2FA) for Admin and Finance accounts

13.2 Transaction Security

- Chassis Number locked to single transaction — system blocks duplicate assignment
- Payment records immutable — only Finance can add, no editing/deleting
- Status changes require authorization level — e.g. only Finance can confirm payment
- All status changes emailed to buyer — buyer can flag discrepancies

13.3 Anti-Fraud Measures

- Warning banner displayed: 'Beware of fake websites and emails impersonating [Platform Name]'
- All invoices sent only from official domain email
- Bank details shown only in logged-in secure area
- Buyers warned never to transfer money without a system-generated invoice

14. Technology Stack Recommendation

Layer	Recommended Technology	Why
Frontend	Html, CSS, JS	SEO-friendly, fast, modern UI
Backend	PHP (Custom MVC), Node.js	Proven for marketplace platforms
Database	MySQL	Relational — perfect for financial records
File Storage	Cloude	Secure document & photo storage
Auth	JWT + OAuth2	Secure session management
Notifications	Email	Reliable multi-channel delivery
Search	MySQL Full-text	Fast vehicle search and filtering
Auction API	jpcenter.ru REST API	Fetch upcoming auction listings
Payments	Bank Wire (manual)	Start manual, add gateway later
Admin Panel	Custom built	Full control over all features

End of Documentation — Version 1.0

This document covers the complete business model, user flows, admin features, and technical architecture for the Japanese Used Car Export Platform.
